AMENDMENT

To the Specification:

Please amend paragraph [0037] as follows:

[0037] The invention also provides a liquid crystal display structure having a color filter layer above the reflective layer and the transmission layer ~~so that the reflective layer and the transmission layer can have a planar surface, and the color filter layer has a~~ planar surface. Aside from having excellent legibility and display efficiency, the LCD structure is able to minimize liquid crystal misalignment caused by an uneven reflective layer."
